PROFESSIONAL SUMMARY

Java Full Stack Developer with 3.1 years of experience delivering enterprise-grade applications using Java, Spring Boot, Microservices, and REST APIs. Strong expertise in Angular (v8–15) with NgRx-based state management, RxJS-driven data flows, and complex form-heavy UI development, alongside backend performance and relational database design. Experienced in AWS deployments, Docker-based environments, CI/CD pipelines, and production support within Agile teams. Strong understanding of scalable system design, REST API best practices, and performance optimization strategies.

TECHNICAL SKILLS

- **Languages:** Java (8, 11, 17), JavaScript (ES6+), TypeScript, SQL
- **Frameworks & Technologies:** Spring Boot, Spring MVC, Spring Security (JWT, OAuth2), Spring Data JPA, Hibernate, Microservices, RESTful APIs
- **Frontend:** Angular (v8–15, NgRx, RxJS, Lazy Loading, Feature Modules, Reactive Forms, Component-Based Architecture), React.js, Redux, HTML5, CSS3, Bootstrap, Material UI
- **Databases:** MySQL, PostgreSQL, Oracle, MongoDB
- **Cloud & DevOps:** AWS (EC2, S3, RDS), Docker, Jenkins, CI/CD Pipelines
- **Testing:** JUnit, Mockito, Cucumber, Unit & Integration Testing
- **Agile & Collaboration:** Agile / Scrum, JIRA
- **Architecture & Design:** Microservices, RESTful APIs, Design Patterns
- **Soft Skills:** Problem Solving, Team Collaboration, Code Review, Client Communication.

PROFESSIONAL EXPERIENCE

Multigenesys Software Pvt. Ltd. - Java Full Stack Developer

April 2023 – Present

- Architected 8+ **Spring Boot microservices** serving 10k+ users
- Migrated legacy JSP screens to Angular, improving maintainability.
- Optimized **MySQL** queries to improve backend response time.
- Handled **AWS EC2 deployments** and release activities.
- Contributed to **microservices architecture design** and service-to-service communication using REST.
- Built Angular v8–15 frontend modules using NgRx for centralized state management, RxJS for async data handling, and reusable component-based UI architecture for complex enterprise workflows.

PROJECTS

Credit Processing System (Banking Domain)

Tech Stack: Java, Spring Boot, Microservices, Angular (v8–15, NgRx, RxJS, Reactive Forms), REST APIs, MySQL

- Engineered Spring Boot microservices for borrower onboarding and credit processing workflows.
- Planned secure REST APIs integrated with Angular frontend modules.
- Implemented role-based access control using Spring Security.
- Migrated legacy JSP modules to Angular.
- Optimized database queries to improve API response time.
- Participated in Agile development and production deployments.
- Built Angular modules (v8–15) with NgRx, handling complex forms and workflows, fully integrated with

Spring Boot microservices.

Bhoomi22 – Land Records Management System

Tech Stack: Java 8, Spring Boot, Hibernate, React.js, MySQL, AWS EC2, S3, Redis

- Architected backend REST APIs for land record processing and workflows.
- Built React.js UI components for data entry and visualization.
- Integrated AWS S3 for document upload and download.
- Executed Redis caching to reduce API response time by ~40%.
- Handled production deployments and ongoing issue resolution on AWS.

EDUCATION

BCA - 2022 - Sangola College, Sangola
